ARTURO COELLO

PERFORMANCE
IS A
HEAD GAME

EVERY RACQUET HAS A UNIQUE FINGERPRINT.

To enhance the playability and performance of our racquets, HEAD uses different strategic material positioning and density combinations to construct unique handmade frames.

**OUR KNOW-HOW CREATES
A UNIQUE PERFORMANCE
TO SUIT YOUR STYLE OF PLAY.**

ARIANA SANCHEZ FALLADA

HEAD®

PADEL FACTS

SHAPES

We offer racquets in diamond, teardrop and round shapes. The shape helps to determine a racquet's playing characteristics.

DIAMOND SHAPE

Sweetspot further away from the grip

MORE POWER
LESS MANEUVERABILITY

FOR
OFFENSIVE PLAYERS

TEARDROP SHAPE

Sweetspot in the center

BALANCED
POWER & CONTROL
BIGGER SWEET SPOT

FOR
OFFENSIVE & DEFENSIVE PLAYERS

ROUND SHAPE

Sweetspot closer to the grip

MORE CONTROL AND PRECISION
MORE MANEUVERABILITY
BIGGER SWEET SPOT

MOSTLY FOR
CONTROL PLAYERS

HITTING SURFACE

The type and combination of materials used in the hitting surface affects how a racquet performs. Different materials can deliver totally different playing characteristics, even if the specs (shape/weight) are similar.

CARBON FIBER

Higher stiffness during impact = MORE CONTROL

FIBERGLASS

More flexibility/softness during impact = MORE POWER

EXTREME
SPIN

Extreme Spin is a rough surface with circular form that multiplies the extreme spin on the ball.

SCAN TO DISCOVER MORE

For more information about Padel, including the court and the scoring, scan the QR code.

FOAM

The foam stiffness, defined by the material density, influences the performance of the racquet. HEAD features the following foams in its racquets:

POWER
FOAM

Power foam is the perfect ally for maximum power. The speed your ball will reach will surprise your opponents as much as yourself.

COMFORT
FOAM

Comfort foam is the ideal pick for the player who wants maximum comfort. It also absorbs the vibrations at the same time as increasing the power of your shot.

SOFT
FOAM

Soft foam features a ultra-fast memory that maximizes sweet spot and comfort when hitting.

DRILLING PATTERN

The number, size and position of the holes change the performance of the racquet, with a direct impact on control, power and spin.

QUANTITY

More holes = hitting surface deflects more
-> MORE POWER & SPIN

SIZE

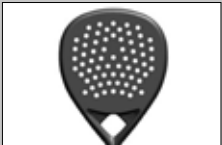

Bigger holes = hitting surface deflects more
-> MORE POWER & SPIN

POSITION

Fewer/smaller holes in the sweetspot area
-> MORE CONTROL

OPTIMIZED
SWEET SPOT

The identity of every racquet is unique; some are characterized by control and precision, others by power or spin. For this, HEAD has developed the Optimized Sweet Spot in order to adapt every drilling pattern to the particularities of each racquet.

FRAME

Every single racquets has its own DNA. Some will feature control and precision, other power or comfort. For this reason, HEAD has developed the Smart Bridge to adapt the bridge area to the needs of each racquet.

TAILORED
FRAME

Every tube section is individually constructed to achieve the best performance for each racquet.

We have the know-how to develop specific and unique constructions of the bridge area to deliver different benefits and performance.

PROTECTION

ANTI
SHOCK

Special polymer foil increases the durability of the racquet, protecting it from bumps and scratches.

INTEGRATED
PROTECTOR

The Integrated Protector is a pre-molded carbon bumper that protects your racquet from chips and scratches, which extends the lifetime of your racquet.

AUXETIC

AUXETIC SENSATION

Feel every shot and get more confident in your game with HEAD Auxetic technology. It actively responds, giving real-time, super-accurate feedback. It really is sensational.

WHAT IS AUXETIC?

Auxetic constructions show a unique deformation compared to non-Auxetic constructions. Due to their internal properties, Auxetic constructions widen when a “pull” force is applied and contract when squeezed. The bigger the applied force, the bigger the Auxetic reaction.

WHERE IS AUXETIC LOCATED ON OUT PADEL RACQUETS?

Auxetic is designed to react to ball impact and give the best impact feel by adapting its internal structure. Based on extensive research, we optimized its placement in the carbon fiber engineered yoke piece of the racquet.

WHAT IS THE BENEFIT OF AUXETIC?

Auxetic actively responds by adapting its internal structure giving superb feedback and a good solid impact feel. On ball impact, a big force is applied to the yoke piece, caused by the strings pulling it towards the center of the racquet. Depending on where the ball hits the surface, the force of the impact will be applied at different locations in the yoke piece.

GRAPHENE INSIDE

Strategically positioned in most of our racquets, Graphene strengthens the frame, provides greater stability and optimises energy transfer from racquet to ball. When you buy your next racquet, be sure it has GRAPHENE INSIDE.

C.P.I. 2023
CONTROL.POWER.INDEX

FIND THE PERFECT RACQUET FOR YOUR INDIVIDUAL PLAYING STYLE.

What primary benefit are you looking for in a racquet: POWER, CONTROL or BOTH?

What is your preferred racquet balance: HEAD LIGHT, HEAD HEAVY or EVEN?

BALANCE-WEIGHT-DISTRIBUTION

Due to their length and geometry, Padel racquets tend to be head heavy. A racquet's balance tends to have a direct influence on its power and maneuverability.

HEAD HEAVY = more power = PROs

HEAD LIGHT = more maneuverability = BEGINNERS

The head shape, together with the HEAD-engineered weight distribution, determines the balance of each racquet.

RACQUET WEIGHT

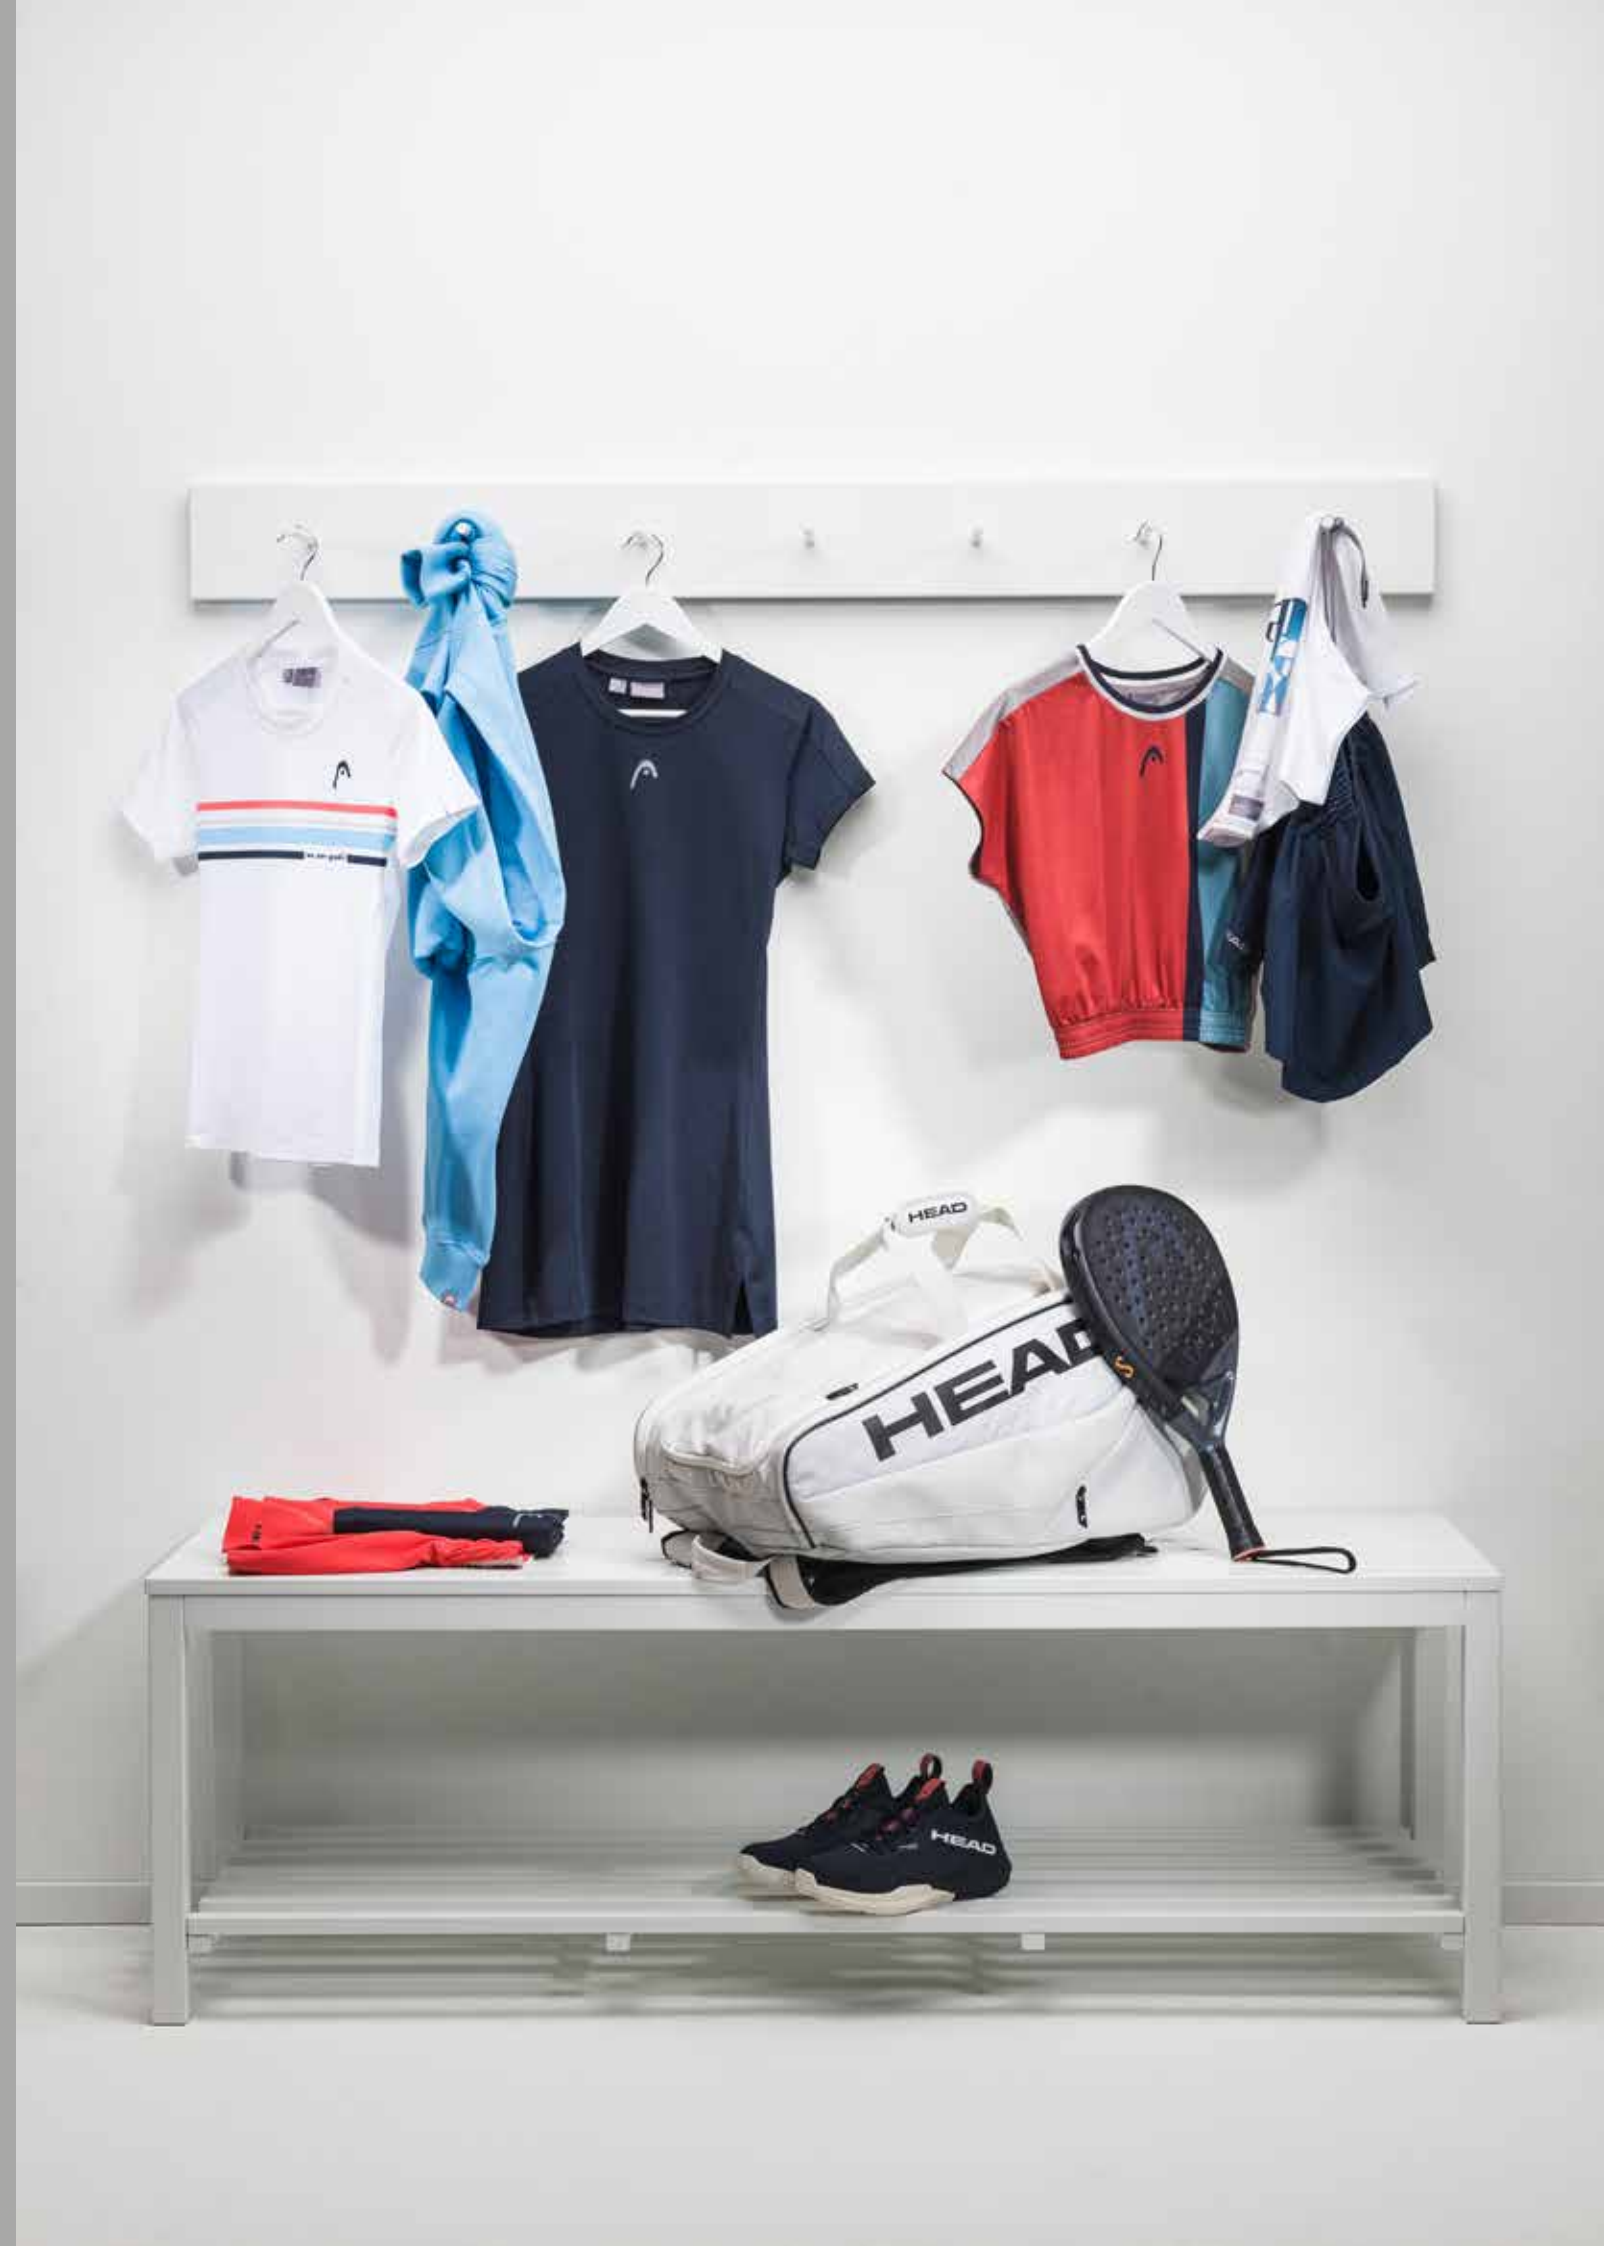

340g - 360g: mostly beginners/intermediate players

360g - 375g: mostly tournament/professional players

But: Some more advanced players, as well as some professionals, play with lighter racquets because of the faster handling and reduced physical strain on the arm. And some beginners use heavier racquets for a more solid feel and easy power.

SPEED RACQUETS

SPEED RACQUETS

NEW

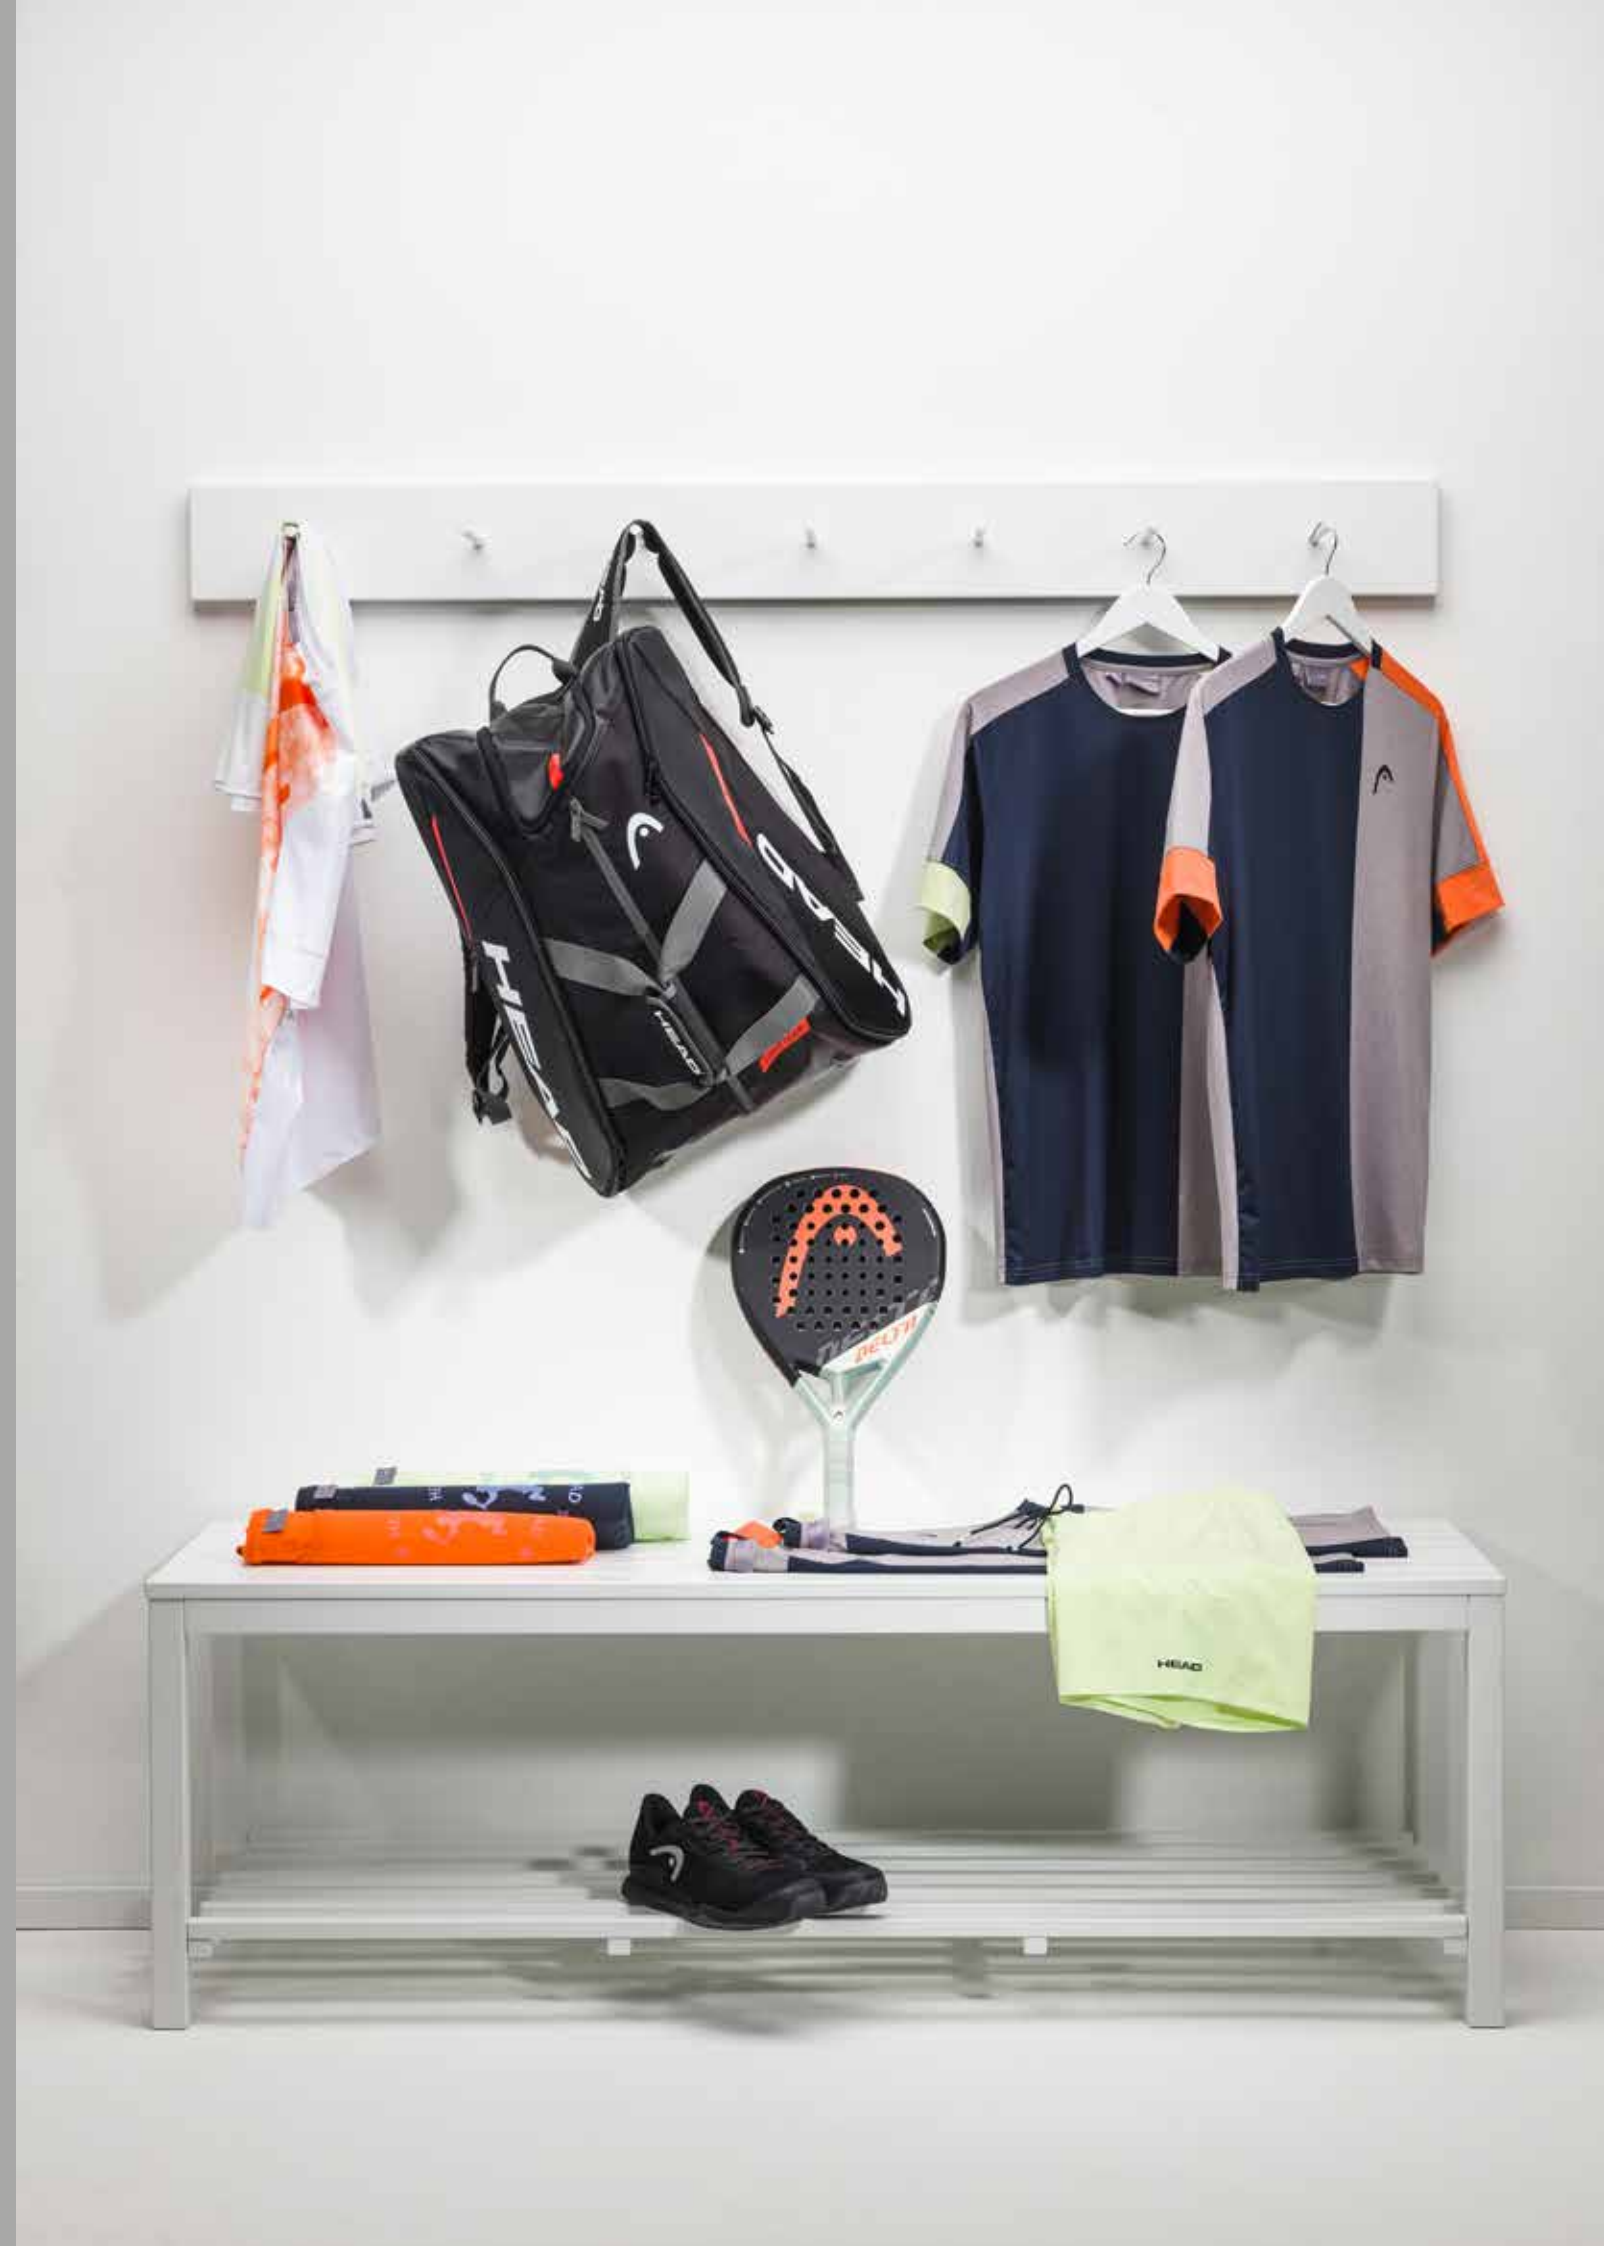

A Split-Second Faster for a Winning Edge
Mix it up, and play your fast game, with the highly versatile SPEED. Innovative Auxetic technology supplies superb impact feel and added power while a new soft butt cap enhances feeling and touch.

NAME STRUCTURE

NEW

To make it easier to find the right bag, we have created a new naming structure. Every bag's name now starts with the segment followed by the silhouette, size and color.

With this new, clearer structure, customers can more easily find the bag to suit their needs. There is more flexibility when choosing the bag that is right for you, with more and better combinations.

PADEL FOOTWEAR

FOOTWEAR TECHNOLOGIES

COMFORT

OrthoLite®

With its innovative long-term cushioning, and lightweight, highly breathable foam, the OrthoLite® insole enhances comfort on and off the court. The moisture management helps to keep the foot cool, dry and comfortable. On top of that, the insole is machine-washable.

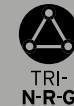

HEAD Cooling System

Perforations in the outsole, midsole and sockliner ensure great ventilation in the bottom of the shoe. Also includes a breathable upper mesh material that provides optimal cooling.

Sock Support System

Fully integrated elastic sock construction for initial comfort and better support.

HEAD TRI-NRG

HEAD's complete support technology. First, NRG Neutralizes impact in the heel area, then it is Rigid in the midfoot area for excellent torsional support properties and densities in each area of the shoe are key elements in this HEAD footwear technology.

DynaFoam

Created with small air cells, this highly responsive, lightweight midsole offers exceptional comfort and lasts longer than conventional EVA midsoles.

STABILITY

DeltaStrap

Triangle shaped midfoot straps are integrated into the lacing for best stability and an individual fit.

HEAD Lateral Control+

Reinforced sidewall for outstanding lateral stability which also helps to prevent rolling over during more extreme moves.

HEAD Lateral Control

HEAD includes additional lateral stability on all our top performance shoes to help avoid rolling over during extreme slides.

HEAD Lockdown Strap

Midfoot straps integrated into the lacing system keep your foot in place.

HEAD Heel Stabilizer 180°

TPU Brace that wraps around the heel for best fit and support.

HEAD T-KORE 360°

Highlighted by the shoe's design, HEAD T-KORE 360° brings together the performance technologies that ambitious players need. The innovations give your shoe a core strength, with enhanced stability, abrasion resistance and torsional support.

DURABILITY

HEAD Hybrasion+

A special rubber compound developed for padel shoes. Guarantees the best traction for all court surfaces while still providing excellent durability for players who slide a lot.

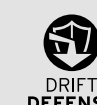

HEAD Hybrasion

Non-Marking rubber compound that provides good grip and offers great durability on all surfaces.

SuperFabric®

Extremely abrasion resistant and at the same time really flexible upper material.

HEAD Drift Defense

In order to have a complete durable shoe, the upper of a padel shoe needs to be durable as well, especially around the toe and medial forefoot area. HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defence technology to protect this area during aggressive toe drags.

MOTION PRO PADEL

Developed with our pro players, this is HEAD's first shoe engineered specifically for padel, offering 360-degree movement and high performance with modern comfort, stability and breathability.
