COLLECTION

HEAD®

ARTURO
COELLO

THAT SOUNDS LIKE HEAD *PADEL*

We are a team of dedicated specialists who have been playing, winning and loving this incredible game.

For over 25 years we've been making head-to-toe, high performance Padel equipment and players have trusted us to deliver what they need to elevate their game.

DEDICATED TO PADEL SINCE 2000

HEAD[®] PADEL

PADEL TECHNOLOGIES

We offer racquets in diamond, teardrop and round shape. The shape determines the racquet's playing characteristics.

SHAPE

DIAMOND SHAPE

- Sweetspot further away from the grip
- More power
- Less maneuverability

FOR OFFENSIVE PLAYERS

TEARDROP SHAPE

- Sweetspot closer to the center
- Balanced power & control

FOR VERSATILE PLAYERS

ROUND SHAPE

- Sweetspot closer to the grip
- More maneuverability and control

FOR CONTROL PLAYERS

FOAM

POWER FOAM

Power Foam is the perfect ally to get the maximum power and force, enhancing attacking shots like smash, X3 or X4.

COMFORT FOAM

Comfort Foam is ideal for a forgiving racquet, absorbing vibrations as well as providing easy power.

SOFT FOAM

Soft Foam is engineered to maximize the sweetspot and to provide extra comfort and smooth feeling

CONTROL FOAM

Control Foam enhances the sweetspot and gives extra precision for shots like bandeja or chiquita.

The type of materials used in the hitting surface affects how a racquet performs. In combination with the foam, it defines the stiffness of the racquet. Different materials can deliver totally different playing characteristics, even if the specs (shape/weight) are similar.

HITTING SURFACE

CARBON FIBER

Rigid, strong and lightweight material which provides higher stiffness.

FOR CONTROL AND EXPLOSIVE POWER

HYBRID WOVEN

Carbon fiber and fiberglass woven together, creating a composite material that takes advantage of the strengths of both fibers.

FOR BALANCED CONTROL AND POWER

FIBERGLASS

The most elastic material, providing more flexibility and softness during impact.

FOR EASY POWER

EXTREME SPIN

Extreme Spin is a rough 3D decal technology that maximizes the spin and traction on the ball.

SPIN SURFACE

Generate extra spin with the new rough lacquer technology that delivers extra grip on ball impact.

DRILLING PATTERN

The number, size and position of the holes change the performance of the racquet, with a direct impact on control and power.

QUANTITY

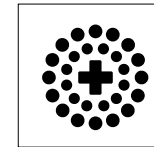

More holes = hitting surface deflects more
FOR MORE BALL OUTPUT

SIZE

Bigger holes = hitting surface deflects more
FOR MORE POWER

POSITION

Fewer/smaller holes in the sweetspot area
FOR MORE CONTROL

OPTIMIZED SWEETSPOT

The identity of every racquet is unique; some are characterized by control and precision, others by power. The Optimized Sweetspot technology adapts every drilling pattern design to the character of each racquet.

FRAME

SOFT BUTT CAP

The special soft butt cap is made of two-component construction material providing comfortable and soft handling. It is ideal for dampening vibration and pressure reduction.

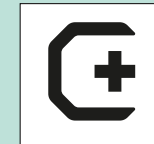

TAILORED FRAME

Each racquet frame is meticulously crafted and engineered for optimal performance. Some of our racquets are tubeless, amplifying the foam surface area by suppressing the tube to maximize sweetspot, increase playability, and obtain higher tolerance.

SMART BRIDGE

Every single racquet has its own character and DNA. Smart Bridge technology is the specific and unique development of the yoke area construction to deliver different benefits adapting to the needs of each racquet.

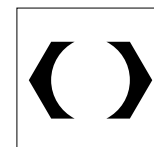

SOFT CAP+

The new Soft Cap + features an interchangeable cord system with an advanced dual-component soft material construction for superior comfort and a cushioned grip. The customizable cord system allows you to match your style and color while enhancing hygiene. The soft material is engineered to reduce vibrations and help prevent injuries and blisters for a more enjoyable playing experience.

PROTECTION

ANTI SHOCK

Special polymer foil which increases the durability of the racquet, protecting it from bumps and scratches. It can also be easily replaced, maximizing the lifespan.

INTEGRATED PROTECTOR

The Integrated Protector is a pre-molded carbon bumper that protects your racquet from chips and scratches, which extends the lifetime of your racquet.

AUXETIC 2.0

Feel every shot and get more confidence in your game with HEAD Auxetic 2.0 technology.

It actively responds, giving real-time, super-accurate feedback. It really is sensational.

WHAT IS AUXETIC 2.0?

Auxetic engineering gives a unique experience compared to non-Auxetic constructions. Due to their internal properties, Auxetic constructions expand when a "pull" force is applied and contract when squeezed. The bigger the applied force, the bigger the Auxetic reaction. The Auxetic cage means you feel the impact right when and where the action happens, it is the ultimate connection between player and racquet.

WHERE IS IT LOCATED?

Auxetic 2.0 is designed to react to ball impact and give the best Contact feel by adapting its internal structure. Based on extensive research, we optimized its placement in both the carbon engineered yoke of the racquet and the middle bar situated in the grip. Double the connection and double the feeling.

AUXETIC CAGE

Our revolutionary carbon structure within the middle-bar grip utilises Auxetic 2.0 technology for the ultimate connection between you and your racquet, giving a FEEL like never before.

GRAPHENE INSIDE

Strategically positioned in most of our racquets, Graphene strengthens the frame, provides greater stability and optimises energy transfer from racquet to ball. When you buy your next racquet, be sure it has GRAPHENE INSIDE.

WHAT IS THE BENEFIT?

Auxetic 2.0 actively responds by adapting its internal structure giving superb feedback and a good solid impact feel. On ball impact, a large force is applied to the yoke piece, caused by the hitting surface pulling it towards the center of the racquet. Depending on where the ball impacts the surface, the force will be applied at different locations in the yoke piece.

PADEL FACTS

FIND YOUR PERFECT RACQUET

What type of player are you? What is your skill level?

What primary benefit are you looking for in a racquet: power, control or versatility?

Find your perfect racquet depending your style and level with the matrix racquet finder below.

RACQUET BALANCE

Due to their length and geometry, padel racquets tend to be head heavy. A racquet's balance tends to have a direct influence on its power and maneuverability.

HEAD HEAVY = more power = TOURNAMENT
HEAD LIGHT = more maneuverability = RECREATIONAL

The head shape, together with the HEAD-engineered weight distribution, determines the balance of each racquet.

RACQUET WEIGHT

< 340 g: mostly recreational and casual players
340 g - 360 g: mostly intermediate and casual players
> 360 g: mostly advanced and tournament players

BUT: Some more advanced players, as well as some professionals, play with lighter racquets because of the faster handling and reduced physical strain on the arm. And some beginners use heavier racquets for a more solid feel and easy power.

EXTREME RACQUETS

EXTREME ONE RACQUETS

Powerful Touch and Durability
Turn the power up to the maximum with the best touch impact feel and superior durability with the diamond-shaped EXTREME ONE racquets, which are made for advanced players who are looking to attack every point. Upgraded with the latest technologies, this series offers exceptional support for overhead shots while enhancing impact feel and sweetspot. The range includes two models with HEAD ONE technology, a revolution in padel racquet design with just one hole.

FOOTWEAR TECHNOLOGIES

HEAD TRI-NRG
HEAD's complete midsole technology. First, NRG **N**utralizes impact in the heel, then it is **R**igid in the midfoot for excellent torsional support and finally, **G**enerates energy in the forefoot for faster acceleration.

DYNAFOAM
Created with small air cells, this highly responsive, lightweight midsole offers exceptional comfort and lasts longer than conventional EVA midsoles.

SOCK SUPPORT SYSTEM
Fully integrated elastic sock construction for initial comfort and better support.

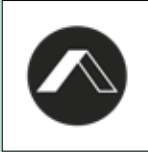

HEAD COOLING SYSTEM
Perforations in the outsole, midsole and sock-liner ensure great ventilation in the bottom of the shoe. Also includes a breathable upper mesh material that provides optimal cooling.

ORTHOLITE®
With its innovative long-term cushioning, and lightweight, highly breathable foam, the OrthoLite® insole enhances comfort on and off the court. The moisture management helps to keep the foot cool, dry and comfortable. On top of that, the insole is machine-washable.

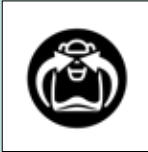

BOA® PERFORMFIT™ WRAP
Delivers micro-adjustable, precision fit engineered to perform in any conditions.

DELTA STRAP
Triangle shaped midfoot straps are integrated into the lacing for best stability and an individual fit.

HEAD HEEL STABILIZER 180°
TPU Brace that wraps around the heel for best fit and support.

HEAD LOCKDOWN STRAP
Midfoot straps integrated into the lacing system keep your foot in place.

HEAD LATERAL CONTROL
HEAD includes additional lateral stability on all our top performance shoes to help avoid rolling over during extreme slides.

HEAD LATERAL CONTROL+
Reinforced sidewall for outstanding lateral stability which also helps to prevent rolling over during more extreme moves.

CORE FRAME
3D TPU frame running throughout the core of the shoe, providing the player with stability from heel to toe. Its unique shape in the heel area allows shearing forces to occur based on where the player lands, enhancing control and performance.

CORE CONTROL
3D TPU sidewall strategically positioned in the lateral forefoot, providing the player with optimal stability during lateral movements.

SUPERFABRIC®
Extremely abrasion resistant and at the same time really flexible upper material.

HEAD DRIFT DEFENSE
HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defense technology to protect the toe and medial forefoot area during aggressive toe drags.

HEAD HYBRASION
Non-Marking rubber compound that provides good grip and offers great durability on all surfaces.

HEAD HYBRASION+
A special rubber compound developed for tennis shoes. Guarantees the best traction for all court surfaces while still providing excellent durability for players who slide a lot.

PADEL BALLS PRESSURIZER

The HEAD Pressurizer is a device designed to restore padel balls to their peak performance by maintaining their optimal pressure. This innovative tool can accommodate three balls in its transparent chamber. Users inflate the chamber using the provided pump until the gauge indicates the ideal pressure has been reached. This system efficiently revives the bounce of padel balls, extending their usable lifespan. The Pressurizer's compact and lightweight design ensures easy portability from court to court, making it convenient for players on the go.
