

HEAD PADEL COLLECTION 2027

HEAD®
PADEL

THE NEW SOUND OF HEAD *PADEL*

We are a team of dedicated specialists who have been playing, winning and loving this incredible game.

For over 25 years we've been making head-to-toe, high performance Padel equipment and players have trusted us to deliver what they need to elevate their game.

DEDICATED TO PADEL SINCE 2000

HEAD PADEL

HEAD Pro Players may play with different racquets from the model shown.

PADEL TECHNOLOGIES

SHAPE

We offer racquets in diamond, teardrop and round shape. The shape determines the racquet's playing characteristics.

ROUND SHAPE

- Sweetspot closer to the grip
- More maneuverability and control

FOR CONTROL PLAYERS

TEARDROP SHAPE

- Sweetspot closer to the center
- Balanced power & control

FOR VERSATILE PLAYERS

DIAMOND SHAPE

- Sweetspot further away from the grip
- More power
- Less maneuverability

FOR OFFENSIVE PLAYERS

FOAM

The foam stiffness, defined by the material density, influences the performance of the racquet. HEAD features the following foams in its racquets:

POWER FOAM
Power Foam is the perfect ally to get the maximum power and force, enhancing attacking shots like smash, X3 or X4.

CONTROL FOAM
Control Foam enhances the sweetspot and gives extra precision for shots like bandeja or chiquita.

COMFORT FOAM
Comfort Foam is ideal for a forgiving racquet, absorbing vibrations as well as providing easy power.

SOFT FOAM
Soft Foam is engineered to maximize the sweetspot and to provide extra comfort and smooth feeling

HITTING SURFACE

The type of materials used in the hitting surface affects how a racquet performs. In combination with the foam, it defines the stiffness of the racquet. Different materials can deliver totally different playing characteristics, even if the specs (shape/weight) are similar.

CARBON
Rigid, strong and lightweight material which provides higher stiffness.
FOR CONTROL AND EXPLOSIVE POWER

CARBON HYBRID
Carbon fiber and fiberglass woven together, creating a composite material that takes advantage of the strengths of both fibers.
FOR BALANCED CONTROL AND POWER

DUAL WEAVE
The most elastic material, providing more flexibility and softness during impact.
FOR EASY POWER

EXTREME SPIN
Extreme Spin is a rough 3D decal technology that maximizes the spin and traction on the ball.

SPIN SURFACE
Generate extra spin with the new rough lacquer technology that delivers extra grip on ball impact.

DRILLING PATTERN

The number, size and position of the holes change the performance of the racquet, with a direct impact on control and power.

FLOW GRID

Bigger holes in the outer area of the drilling pattern for better ball output. Reduced size holes around the sweetspot area define better control.

DRIVE GRID

Medium size holes in the outer area of this drilling pattern support a good balance of stiffness and ball output. Smaller holes in the sweetspot area define better control.

POWER GRID

With this drilling pattern the holes are more localized in the center of the racquet to improve power.

FRAME

TUBELESS FRAME
HEAD's tubeless frame construction enables the foam to expand to the most outer layer of the carbon frame. This provides a bigger sweetspot which resonates in a outstanding improvement of the playability of the racquet.

CARBON FRAME
A full carbon fiber frame construction for superior rigidity, stability, and long-lasting performance. It provides the best energy transfer and reactivity for fast shots, for more power and precision.

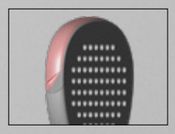

AERO SHAFT
Higher maneuverability through channeled aerodynamic air flow in the shaft.

SOFT CAP+
The Soft Cap + features an interchangeable cord system with an advanced dual-component soft material construction for superior comfort and a cushioned grip. The customizable cord system allows you to match your style and color while enhancing hygiene.
The soft material is engineered to reduce vibrations and help prevent injuries and blisters for a more enjoyable playing experience.

CONTROL CHASSIS
The frame of this racquet is constructed to transport the feeling which is generated while hitting the ball from the frame to your hand. This results in an extraordinary control of your shot.

PROTECTION

SHOCK SHIELD
HEAD's Shock Shield technology is designed to protect your racquet from shocks and scratches and extends its lifetime.

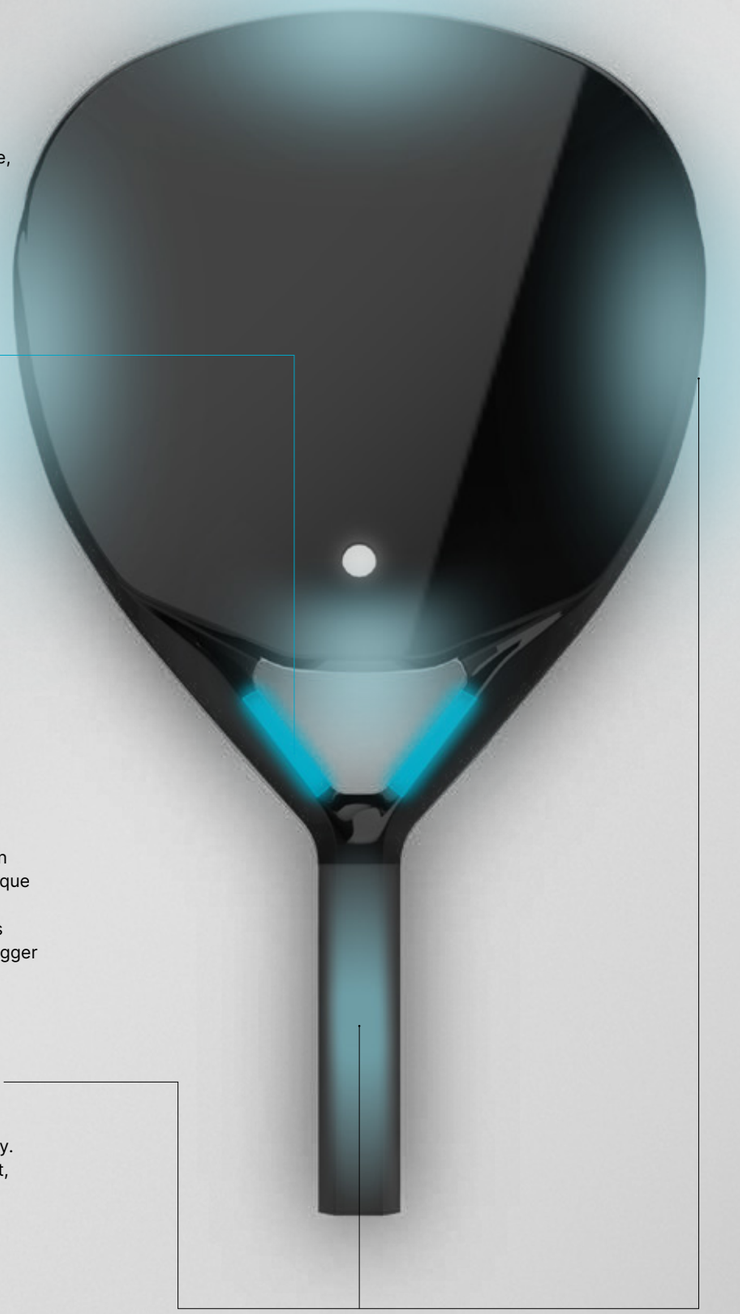

INTEGRATED PROTECTOR
The Integrated Protector is a pre-molded carbon bumper that protects your racquet from chips and scratches, which extends the lifetime of your racquet.

HY-BOR & AUXETIC 2.0

What is Hy-Bor?

Hy-Bor is a hybrid boron-carbon material. Carbon fibers provide high strength under tension, while boron fibers provide high strength under compression. By combining them, Hy-Bor makes the racquet more stable, controlled and responsive.

What is the benefit of Hy-Bor?

HEAD is the first to add this technology to the shaft of the padel racquets, increasing the perceived stability, power and control of the racquet.

What is Auxetic 2.0?

Auxetic technology uses a special orientation in the carbon fiber structure that creates unique physical properties. This structure expands when a pulling force is applied and contracts when squeezed. The bigger the force, the bigger the Auxetic reaction.

What is the benefit of Auxetic 2.0

Feel every shot and be more confident in your game with HEAD Auxetic 2.0 technology. It actively responds, as you use your racquet, giving real-time, super-accurate feedback.

PADEL FACTS

FIND YOUR PERFECT RACQUET

What type of player are you? What is your skill level?
What primary benefit are are you looking for in a racquet: power, control or versatility?

Find your perfect racquet depending your style and level with the matrix racquet finder below.

RACQUET BALANCE

Padel racquets support different playing styles.
Head-heavy models offer more power for attacking play, while mid- and low-balance racquets provide greater control and maneuverability for strategic and defensive games.

The head shape, together with the HEAD-engineered weight distribution, determines the balance of each racquet.

RACQUET WEIGHT

Under 350 g casual and beginner players
350 - 360 g intermediate players
Over 360 g advanced and tournament players

Each player's physical abilities and overall body capacity should be taken into account when choosing racquet weight and playability.

MOTION PRO 1.5 BOA PADEL

DYNA FOAM · COOLING SYSTEM · SOCK SUPPORT SYSTEM · HEEL STABILIZER 180° · LATERAL CONTROL · DRIFT DEFENSE · HYBRASION · BOA PERFORMFIT™ WRAP

Precise Traction And Fit

The Motion Pro 1.5 BOA Padel shoe enables quick, confident transitions from deep defense to aggressive net play for competition players and ambitious newcomers with average to wider feet width. A specific Padel outsole, co-developed with MONDO, grips turf for precise traction in every direction. The BOA ® PerformFit Wrap with dual Li2 dials locks in a micro-adjustable, precision fit that stabilizes the foot far beyond traditional lacing.

FOOTWEAR TECHNOLOGIES - PADEL

COMFORT

HEAD TRI-NRG
HEAD's complete midsole technology. First, NRG **N**eutralizes impact in the heel, then it is **R**igid in the midfoot for excellent torsional support and finally, **G**enerates energy in the forefoot for faster acceleration.

DYNAFOAM
Created with small air cells, this highly responsive, lightweight midsole offers exceptional comfort and lasts longer than conventional EVA midsoles.

SOCK SUPPORT SYSTEM
Fully integrated elastic sock construction for initial comfort and better support.

HEAD COOLING SYSTEM
Perforations in the outsole, midsole and sock-liner ensure great ventilation in the bottom of the shoe. Also includes a breathable upper mesh material that provides optimal cooling.

BOA® PERFORMFIT™ WRAP
Delivers micro-adjustable, precision fit engineered to perform in any conditions.

DELTASTRAP
Triangle shaped midfoot straps are integrated into the lacing for best stability and an individual fit.

STABILITY

HEAD HEEL STABILIZER 180°
TPU Brace that wraps around the heel for best fit and support.

HEAD LOCKDOWN STRAP
Midfoot straps integrated into the lacing system keep your foot in place.

HEAD LATERAL CONTROL
HEAD includes additional lateral stability on all our top performance shoes to help avoid rolling over during extreme slides.

HEAD LATERAL CONTROL+
Reinforced sidewall for outstanding lateral stability which also helps to prevent rolling over during more extreme moves.

DURABILITY

HEAD HYBRASION
Non-Marking rubber compound that provides good grip and offers great durability on all surfaces.

HEAD DRIFT DEFENSE
HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defense technology to protect the toe and medial forefoot area during aggressive toe drags.

HEAD HYBRASION+
A special rubber compound developed for tennis shoes. Guarantees the best traction for all court surfaces while still providing excellent durability for players who slide a lot.

PADEL BALLS PRESSURIZER

The HEAD Pressurizer is a device designed to restore padel balls to their peak performance by maintaining their optimal pressure. This innovative tool can accommodate three balls in its transparent chamber. Users inflate the chamber using the provided pump until the gauge indicates the ideal pressure has been reached. This system efficiently revives the bounce of padel balls, extending their usable lifespan. The Pressurizer's compact and lightweight design ensures easy portability from court to court, making it convenient for players on the go.
