HEAD PRO PLAYERS MAY PLAY WITH DIFFERENT RACQUETS FROM THE MODEL SHOWN.

THAT SOUNDS LIKE HEAD *PADEL*

We are a team of dedicated specialists who have been playing, winning and loving this incredible game.

For over 20 years we've been making head-to-toe, high performance Padel equipment and players have trusted us to deliver what they need to elevate their game.

YOUR GAME IS OUR GAME

HEAD[®] PADEL

PADEL FACTS

MOLD SHAPES

We offer racquets in diamond, teardrop and round shape. The shape determines the racquet's playing characteristics.

DIAMOND SHAPE

- Sweetspot further away from the grip
- More power
- Less maneuverability

-> FOR OFFENSIVE PLAYERS

TEARDROP SHAPE

- Sweetspot closer to the center
- Balanced power & control

-> FOR VERSATILE PLAYERS

ROUND SHAPE

- Sweetspot closer to the grip
- More maneuverability and control

-> FOR CONTROL PLAYERS

FOAM

The foam stiffness, defined by the material density, influences the performance of the racquet. HEAD features the following foams in its racquets:

**POWER
FOAM**

Power Foam is the perfect ally to get the maximum power and force, enhancing attacking shots like smash, X3 or X4.

**SOFT
FOAM**

Soft Foam is engineered to maximize the sweetspot and to provide extra comfort and smooth feeling

**COMFORT
FOAM**

Comfort Foam is ideal for a forgiving racquet, absorbing vibrations as well as providing easy power.

**CONTROL
FOAM**

Control Foam enhances the sweetspot and gives extra precision for shots like bandeja or chiquita.

PROTECTION

**ANTI
SHOCK**

Special polymer foil which increases the durability of the racquet, protecting it from bumps and scratches. It can also be easily replaced, maximizing the lifespan.

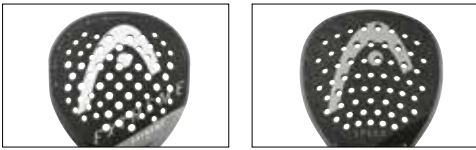

**INTEGRATED
PROTECTOR**

The Integrated Protector is a pre-molded carbon bumper that protects your racquet from chips and scratches, which extends the lifetime of your racquet.

DRILLING PATTERN

The number, size and position of the holes change the performance of the racquet, with a direct impact on control and power.

The identity of every racquet is unique; some are characterized by control and precision, others by power. The Optimized Sweetspot technology adapts every drilling pattern design to the character of each racquet.

QUANTITY

More holes = hitting surface deflects more
-> **FOR MORE POWER**

SIZE

Bigger holes = hitting surface deflects more
-> **FOR MORE POWER**

POSITION

Fewer/smaller holes in the sweetspot area
-> **FOR MORE CONTROL**

FRAME

Every single racquet has its own character and DNA. Smart Bridge technology is the specific and unique development of the yoke area construction to deliver different benefits adapting to the needs of each racquet.

The special soft butt cap is made of two-component construction material providing comfortable and soft handling. It is ideal for dampening vibration and pressure reduction.

Each racquet frame is meticulously crafted and engineered for optimal performance. Some of our racquets are tubeless, amplifying the foam surface area by suppressing the tube to maximize sweetspot, increase playability, and obtain higher tolerance.

HITTING SURFACE

The type of materials used in the hitting surface affects how a racquet performs. In combination with the foam, it defines the stiffness of the racquet. Different materials can deliver totally different playing characteristics, even if the specs (shape/weight) are similar.

Extreme Spin is a rough 3D decal technology that maximizes the spin and traction on the ball.

Generate extra spin with the new rough lacquer technology that delivers extra grip on ball impact.

CARBON FIBER

Rigid, strong and lightweight material which provides higher stiffness.

-> **FOR CONTROL AND EXPLOSIVE POWER**

HYBRID WOVEN

Carbon fiber and fiberglass woven together, creating a composite material that takes advantage of the strengths of both fibers.

-> **FOR BALANCED CONTROL AND POWER**

FIBERGLASS

The most elastic material, providing more flexibility and softness during impact.

-> **FOR EASY POWER**

AUXETIC 2.0

Feel every shot and get more confidence in your game with HEAD Auxetic 2.0 technology. It actively responds, giving real-time, super-accurate feedback. It really is SENSATIONAL.

WHAT IS AUXETIC 2.0?

Auxetic engineering gives a unique experience compared to non-Auxetic constructions. Due to their internal properties, Auxetic constructions expand when a "pull" force is applied and contract when squeezed. The bigger the applied force, the bigger the Auxetic reaction. The Auxetic cage means you feel the impact right when and where the action happens, it is the ultimate connection between player and racquet.

WHERE IS IT LOCATED?

Auxetic 2.0 is designed to react to ball impact and give the best Contact feel by adapting its internal structure. Based on extensive research, we optimized its placement in both the carbon engineered yoke of the racquet and the middle bar situated in the grip. Double the connection and double the feeling.

AUXETIC CAGE

Our revolutionary carbon structure within the middle-bar grip utilises Auxetic 2.0 technology for the ultimate connection between you and your racquet, giving a FEEL like never before.

GRAPHENE
INSIDE

GRAPHENE INSIDE

Strategically positioned in most of our racquets, Graphene strengthens the frame, provides greater stability and optimises energy transfer from racquet to ball. When you buy your next racquet, be sure it has GRAPHENE INSIDE.

WHAT IS THE BENEFIT?

Auxetic 2.0 actively responds by adapting its internal structure giving superb feedback and a good solid impact feel. On ball impact, a large force is applied to the yoke piece, caused by the hitting surface pulling it towards the center of the racquet. Depending on where the ball impacts the surface, the force will be applied at different locations in the yoke piece.

PADEL FACTS

FIND YOUR PERFECT RACQUET

What type of player are you? What is your skill level?

What primary benefit are you looking for in a racquet: power, control or versatility?

Find your perfect racquet depending your style and level with the matrix racquet finder below.

RACQUET BALANCE

Due to their length and geometry, padel racquets tend to be head heavy. A racquet's balance tends to have a direct influence on its power and maneuverability.

HEAD HEAVY = more power = TOURNAMENT

HEAD LIGHT = more maneuverability = RECREATIONAL

The head shape, together with the HEAD-engineered weight distribution, determines the balance of each racquet.

RACQUET WEIGHT

< 340 g: mostly recreational and casual players

340 g - 360 g: mostly intermediate and casual players

> 360 g: mostly advanced and tournament players

BUT: Some more advanced players, as well as some professionals, play with lighter racquets because of the faster handling and reduced physical strain on the arm. And some beginners use heavier racquets for a more solid feel and easy power.

SPEED RACQUETS

SPEED ONE X RACQUET

NEW

Join The Revolution

Part of the HEAD ONE revolution in padel racquet design with just one hole, the SPEED ONE X has been crafted with a premium 2D-layered carbon hitting surface and a heavier weight to support advanced and tournament players. The strongest racquet in the SPEED range with the latest technologies and vibration dampening offers both precision and explosive power to accelerate the game.

PADEL FOOTWEAR

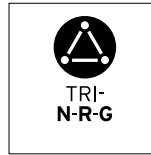

FOOTWEAR TECHNOLOGIES

COMFORT

ORTHOLITE®

With its innovative long-term cushioning, and lightweight, highly breathable foam, the OrthoLite® insole enhances comfort on and off the court. The moisture management helps to keep the foot cool, dry and comfortable. On top of that, the insole is machine-washable.

HEAD TRI-NRG

HEAD's complete support technology. First, NRG Neutralizes impact in the heel area, then it is Rigid in the midfoot area for excellent torsional support properties and densities in each area of the shoe are key elements in this HEAD footwear technology.

HEAD COOLING SYSTEM

Perforations in the outsole, midsole and sockliner ensure great ventilation in the bottom of the shoe. Also includes a breathable upper mesh material that provides optimal cooling.

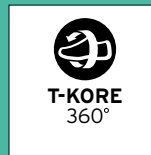

DYNAFOAM

Created with small air cells, this highly responsive, lightweight midsole offers exceptional comfort and lasts longer than conventional EVA midsoles.

SOCK SUPPORT SYSTEM

Fully integrated elastic sock construction for initial comfort and better support.

HEAD T-KORE 360°

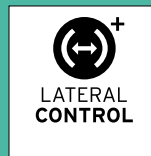

Highlighted by the shoe's design, HEAD T-KORE 360° brings together the performance technologies that ambitious players need. The innovations give your shoe a core strength, with enhanced stability, abrasion resistance and torsional support.

STABILITY

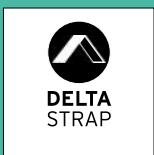

BOA® PERFORMFIT™ WRAP

Delivers micro-adjustable, precision fit engineered to perform in any conditions.

HEAD LATERAL CONTROL+

Reinforced sidewall for outstanding lateral stability which also helps to prevent rolling over during more extreme moves.

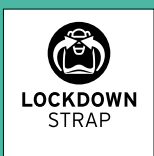

DELTA STRAP

Triangle shaped midfoot straps are integrated into the lacing for best stability and an individual fit.

HEAD LATERAL CONTROL

HEAD includes additional lateral stability on all our top performance shoes to help avoid rolling over during extreme slides.

HEAD LOCKDOWN STRAP

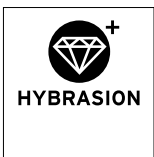

Midfoot straps integrated into the lacing system keep your foot in place.

HEAD HEEL STABILIZER 180°

TPU Brace that wraps around the heel for best fit and support.

DURABILITY

HEAD HYBRASION+

A special rubber compound developed for padel shoes. Guarantees the best traction for all court surfaces while still providing excellent durability for players who slide a lot.

SUPERFABRIC®

Extremely abrasion resistant and at the same time really flexible upper material.

HEAD HYBRASION

Non-Marking rubber compound that provides good grip and offers great durability on all surfaces.

HEAD DRIFT DEFENSE

In order to have a complete durable shoe, the upper of a padel shoe needs to be durable as well, especially around the toe and medial forefoot area. HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defence technology to protect this area during aggressive toe drags.
