RACQUET TECH

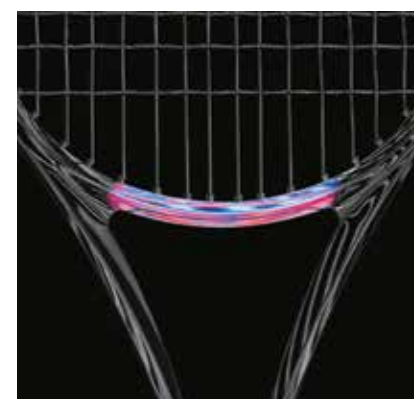

AUXETIC SENSATION

Feel every shot and get more confident in your game with HEAD Auxetic technology. It actively responds, giving real-time, super-accurate feedback. It really is sensational.

WHAT IS AUXETIC?

Auxetic constructions show a unique deformation compared to non-Auxetic constructions. Due to their internal properties, Auxetic constructions widen when a "pull" force is applied and contract when squeezed. The bigger the applied force, the bigger the Auxetic reaction.

WHERE IS AUXETIC LOCATED ON OUR TENNIS RACQUETS?

Auxetic is designed to react to ball impact and give the best impact feel by adapting its internal structure. Based on extensive research, we optimized its placement in the carbon fiber engineered yoke piece of the racquet.

WHAT IS THE BENEFIT OF AUXETIC?

Auxetic actively responds by adapting its internal structure giving superb feedback and a good solid impact feel. On ball impact, a big force is applied to the yoke piece, caused by the strings pulling it towards the center of the racquet. Depending on where the ball hits the string bed, the force of the impact will be applied at different locations in the yoke piece.

GRAPHENE INSIDE

Strategically positioned in most of our racquets, Graphene strengthens the frame, provides greater stability and optimises energy transfer from racquet to ball. When you buy your next racquet, be sure it has GRAPHENE INSIDE.

RACQUET SUBTECHS

SPEED BEAM

The aerodynamic cross-section of the Speed beam maximizes swingspeed and power.

VARIABLE BEAM

The variable beam cross-section perfectly balances the power, control and spin of the racquet.

ELLIPTICAL BEAM

The elliptical cross section in the shoulder area creates more flex during impact and enhances feel.

MORPH BEAM

The unique frame construction merges an elongated box beam shaft with a powerful head for the perfect blend of feel and ease on court.

BOX BEAM

The box beam cross-section stabilizes the frame for maximum control.

FLEX GROOVE

The deeper flex groove softens the cross section geometry in the shoulder area for enhanced impact feel.

ELONGATED SHAFT

Elongated shaft for classic flex and feel appreciated on Tour since 1987.

SPIN SHAFT

The spin shaft provides optimized lateral stability, creating higher spin potential.

FULL CAP

Full cap for signature impact feel and unmistakable sound.

SPEED PATTERN

A special speed string pattern provides with the perfect mix of power under control.

SPIN PATTERN

The open 16/19 string pattern maximizes string snap-back for greater spin generation.

CONTROL PATTERN

A more dense 16/19 string pattern provides the perfect mix of control and power.

UNI PATTERN

The specially designed uniform string pattern allows for a consistent ball trajectory on every shot for reliable and forgiving play.

SPIN GROMMETS

Spin grommets allow for greater main string movement in all directions for maximizing power and spin.

SOUND GROMMETS

Sound grommets provide enhanced power via greater string movement and optimize sound and vibrations.

POWER GROMMETS

The enlarged power grommets maximize string movement for increased power.

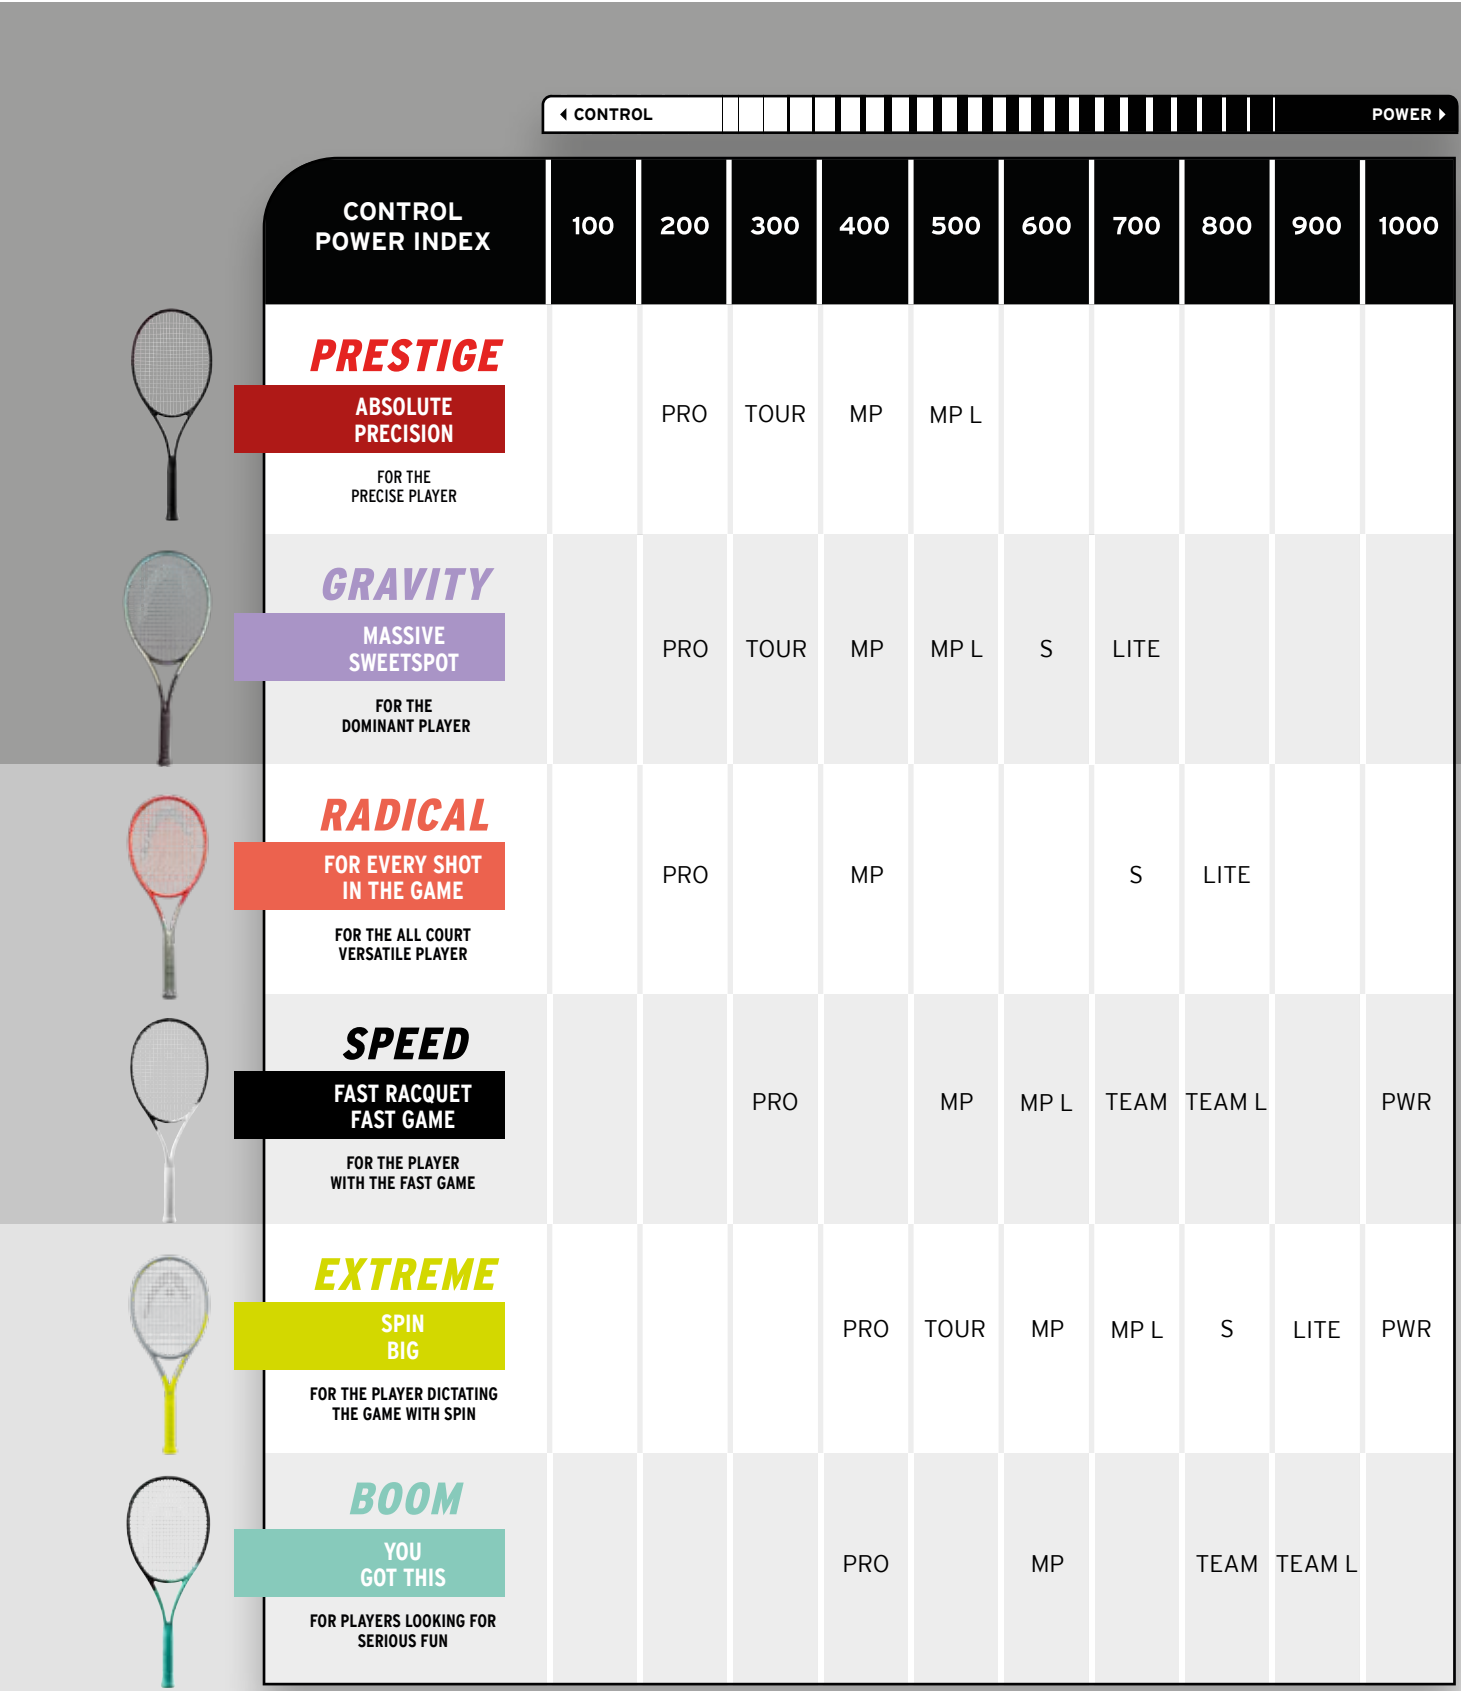

DIRECTIONAL DRILLING

Directional drilling combine increased power and sweetspot, delivering a plush impact feel.

SWEET ZONE

The special sweetzone is created through a rounded head shape with the widest stringbed section raised to the tip for modern play.

HEAD FOOTWEAR

FOOTWEAR TECHNOLOGIES

COMFORT

OrthoLite®

OrthoLite®
With its innovative long-term cushioning, and lightweight, highly breathable foam, the OrthoLite® insole enhances comfort on and off the court. The moisture management helps to keep the foot cool, dry and comfortable. On top of that, the insole is machine-washable.

Sock Support System
Fully integrated elastic sock construction for initial comfort and better support.

HEAD TRI-NRG
HEAD's complete support technology. First, NRG Neutralizes impact in the heel area, then it is Rigid in the midfoot area for excellent torsional support properties and densities in each area of the shoe are key elements in this HEAD footwear technology.

HEAD Cooling System
Perforations in the outsole, midsole and sockliner ensure great ventilation in the bottom of the shoe. Also includes a breathable upper mesh material that provides optimal cooling.

STABILITY

DeltaStrap
Triangle shaped midfoot straps are integrated into the lacing for best stability and an individual fit.

HEAD Lockdown Strap
Midfoot straps integrated into the lacing system keep your foot in place.

HEAD Energy Frame
Inspired by our ski boots, the TPU wings guarantee the best stability when moving sideways. These stability elements have been specifically designed and developed for sports where lateral support is extremely important. This technology is a key element on all our stability products.

HEAD Heel Stabilizer 180°
TPU Brace that wraps around the heel for best fit and support.

HEAD Lateral Control
HEAD includes additional lateral stability on all our top performance shoes to help avoid rolling over during extreme slides.

HEAD T-KORE 360°
Highlighted by the shoe's design, HEAD T-KORE 360° brings together the performance technologies that ambitious players need. The innovations give your shoe a core strength, with enhanced stability, abrasion resistance and torsional support.

DURABILITY

HEAD Hybrasion+
A special rubber compound developed for tennis shoes. Guarantees the best traction for all court surfaces while still providing excellent durability for players who slide a lot.

SuperFabric®
Extremely abrasion resistant and at the same time really flexible upper material.

HEAD Hybrasion
Non-Marking rubber compound that provides good grip and offers great durability on all surfaces.

HEAD Drift Defense
In order to have a complete durable shoe, the upper of a tennis shoe needs to be durable as well, especially around the toe and medial forefoot area. HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defence technology to protect this area during aggressive toe drags.

FOOTWEAR

REVOLT PRO 4.0

Built for aggressive baseliners who are as tough on footwear as they are on opponents, this new performance tennis shoe takes durability to the extreme.

UPPER

Strong and durable mesh
Engineered PU molded chassis
Internal TPU heel counter
Integrated lacing straps

STRING BASICS

MONOFILAMENT

Monofilament strings have a simple construction, as they are extruded as a single filament that is stretched until the desired diameter or dimension is obtained. They are highly engineered products, due to the special Polyester material and the additives which are combined in complex production processes enhancing specific properties.

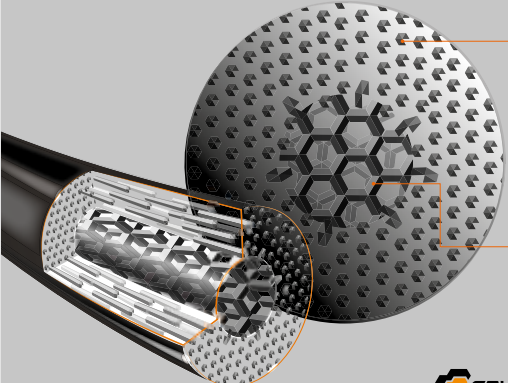

The elasticity of these strings provides excellent control and spin, and the combination of structure and material guarantees long lasting performance for high level players. The cross section can be engineered in a variety of ways: shaped to increase bite on the ball and spin potential, and coated to maximize wear resistance and improve string movement.

MULTIFILAMENT

Multifilament strings are complex. They are a twisted construction with hundreds or even thousands of synthetic microfilaments.

These micro-filaments can be different dimensions, shapes or materials. HEAD uses traditional round filaments and also specially engineered ribbons. The micro-filaments are assembled within a synthetic resin matrix to create a softer impact feeling or more lively touch. The strings are then coated with a thin layer of thermoplastic material, with special additives that increase wear resistance and ensure perfect realignment after every shot. Multifilament strings are very arm friendly, comfortable and powerful, providing a high level of performance.

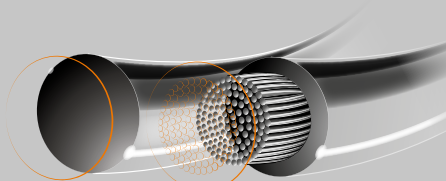

CRYSTAL CORE

Highly oriented molecular chains
Energy Efficiency
INFLUENCES POWER

Crystalline inner core
Dampening and touch
INFLUENCES CONTROL

The ratio control / power is defined by the Crystal Core diameter for Hawk and Hawk Touch.

HYBRID

Hybrids are made by a combination of different strings in the mains and in the crosses of the racquet. The difference between mains and crosses lies in material, dimension, construction or shape.

In this combination the main strings primarily determine the spin potential, the control, and the overall feel and durability of the string bed. The cross strings are responsible for the comfort level, the power, and the outgoing angle that affects the trajectory of the ball.

The hybrid string setup allows players to combine the benefits of each individual string, based on its placement in the mains and crosses.

SOLID CORE WITH OUTER WRAPS

This type of string features a solid core monofilament nylon construction. It offers variable sizes, different dimensions, or can be co-extruded with other thermo-plastic materials.

The core is encased by one or more wraps of microfilaments with varying diameters or materials, and the construction is coated with one or more layers of thermo-plastic materials. Special additives are included to reduce the friction of the surface and to increase the durability.

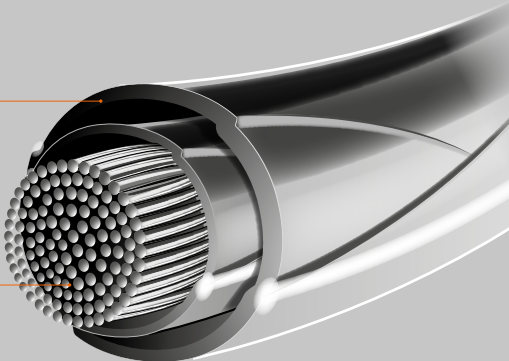

These strings provide a crisper feel compared to multifilament strings and a more balanced combination of power and control. These strings offer a great all-around playability for a wide range of players.

MINI TENNIS NET

“Play and stay” just got easier. We present the T.I.P. NET that is super easy to set up.

ART NO	287201 / 6.1 m
ART NO	287211 / 5.5 m

REPLACEMENT NET

It might be called a “replacement”, but this one is a perfect clone of the original.

ART NO	287221 / 6.1 m
ART NO	287231 / 5.5 m

TIP LINES

The times of crepe or even duct tape on the court are over. T.I.P. LINES is the super easy and secure tool to set up smaller courts for kids’ tennis.

ART NO	287261
--------	--------

TIP NET BELT

The small court is set up, but the grown-up net is still too high. The T.I.P. NET BELT is your solution.

ART NO	287271
--------	--------

COACHING PACK

1 bag, 6 big cones, 12 poles with 8 clips, 12 court lines, 4 court edges, 6 targets, 1 small bag for transportation and 1 HEAD Coaching Poster

ART NO	287241
--------	--------

BALL BASKET + SEPARATOR

The solid ball basket is perfect for coaches to reach balls during practice and store them for later.

ART NO	287251
--------	--------

HEAD BALL TROLLEY

The BALL TROLLEY and its many flexible features is the ultimate storage for balls during and in between training.

ART NO	287256
--------	--------

BALL TROLLEY - ADD. BAG

This BALL TROLLEY - ADDITIONAL BAG is a spare bag for the BALL TROLLEY and allows added flexibility.

ART NO	287266
--------	--------

AGILITY LADDER

The AGILITY LADDER helps you improve your fitness.

ART NO	287501
--------	--------

6 BIG CONES

The CONES are a great tool for all kinds of practice exercises on the tennis court.

ART NO	287511
--------	--------

6 TARGETS

Having a target is making the shot easier. These 6 slim yellow TARGETS are great to set up different exercises.

ART NO	287521
--------	--------

12 COURT MARKS / 4 EDGES

Need a quick court? Use the COURT MARKS and COURT EDGES for a quick set-up or other coaching exercises.

ART NO	287531
--------	--------

8 POLES

POLES are a great partner in setting up different training exercises on the tennis court - and off.

ART NO	287541
--------	--------

4 CLIPS

These 4 CLIPS allow you to connect the poles for added flexibility on the practice court.

ART NO	287551
--------	--------

20 DOME CONES

DOMES are an extremely flexible tool to set up different fitness exercises.

ART NO	287561
--------	--------

BALL TUBE

Pick up balls comfortable with the BALL TUBE. Great fun for kids (and adults alike, admit it!).

ART NO	287571
